## TECHNICAL SHEET: SOFT

---

**COMPOSITION:** Mix of synthetic and natural fibers (cotton-polyester-acrylic).

**CHARACTERISTICS:** Felt soft, gray color, fixed thermally at high temperature (170° C.), with thermoplastic characteristics. It is used for absorption, acoustic and thermal isolation. The product has no chemicals, resins and adhesives and for this reason it is an ecological product. The high process temperatures confer to the product the high hygienic standards (absence in productive phase of pathogenic bacteria, mildews, etc). The maintenance of the hygienic standards depends from the conditions of manipulation and stock. The product is completely recyclable. It is identified for weight (g/sqm), for thickness and packing (rolls or plates). The intrinsic characteristics confer to the product the conformity to the tests of resistance to the flame according to Fiat Specifications 9.55655 from which the Norm of Test Fiat N. 7.G2000, let alone to Norma UL 94

**THICKNESS:** Variable from 8 to 40 mm

**WEIGHT:** Variable from 600 to 2200 g/sqm

**PACKING:** Rolls of variable heights from cm 60 to 240, wrapped in polyethylene film. Plates in polyethylene packages.

**SLABS :** Length: 200 cm max toll.  $\pm 5$   
Width: 160 cm max toll.  $\pm 5$

**APPLICATIONS :** It can be coupled with woven not woven and liners of different types

## EMPLOYMENT FIELDS: Mattresses Automotive

### TECHNICAL SHEET: SOFT

---

#### ADHESIVE:

Hot Melt adhesive coated in stripes of width 1 cm, with a pitch of 1 to 2 cm for the entire surface .

1-2  
1cm cm

The surface of the product is protected with a silicone liner of polyethylene.

The product may be the glue on both surfaces.

Possibly, on a surface, can be attached a textile (TNT from 17 to 120 g / sqm).

#### FURTHER PROCESSING

The product can be die-cut, with or without adhesive, according to customer's design, size max 110 x 120 cm.

## **AREAS OF USE:**

- Automotive
- Appliances
- Building
